THE SPRING SPECIALISTS

RENAULT CLIO/MODUS/ GRAND MODUS

The Renault Clio Mk III (2005 - 2013), Renault Modus (2004 - 2012), and Renault Grand Modus (2004 - 2012) use two different designs of front coil spring, with a change taking place in July 2010.

- The top coil of springs for models up to July 2010 has an inside diameter of approximately 98mm.
- On models from July 2010 onwards, the inside diameter of the top coil is approximately 83mm.

Inside diameters can sometimes be difficult to measure. The correct spring can also be found by checking the shape of the top strut mounting:

**Top strut mount on the earlier model
(up to July 2010):**

**Top strut mount on the later model
(July 2010 onwards):**
